ONLY THE DREAMERS

# INTRODUCTION

## PRODUCTS

When we create products, we pay attention to the environment. We consider all possibilities that will make our products better in the present and for the future.

## PEOPLE

From long-standing supplier relationships to empowering our colleagues, We believe in putting people first.

## PLANET

Our business practices and thinking beyond the finished product. Our projects include new biomaterials or compostable ones, which can create products with multiple textures, imaginative and sustainable, which at the end of their life have no impact on the world.

ONLY THE DREAMERS

# PRODUCTS

## **SUSTAINABLE SOURCED**

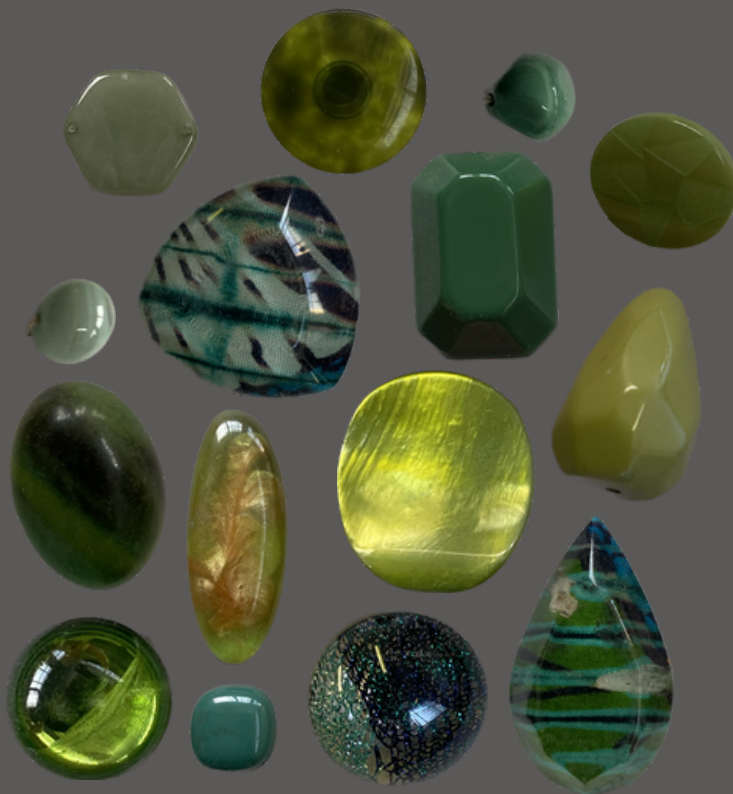

100% of our products are made out of more sustainable sourced materials.

## **BIOMATERIALS OR COMPOSTABLE**

Our products include new biomaterials or compostable materials. This leads to products with multiple textures, that are imaginative and sustainable. Furthermore, at the end of their life, they have no environmental impact.

## **LONG-LASTING**

We use high-quality materials and do not produce for fast fashion companies. Our products are artisanal and handmade, which last relatively long.

ONLY THE DREAMERS

# PRODOTTI

## MATERIE PRIME

### POLYESTER

Organic polyester.

### ACRYL

Recyclable.

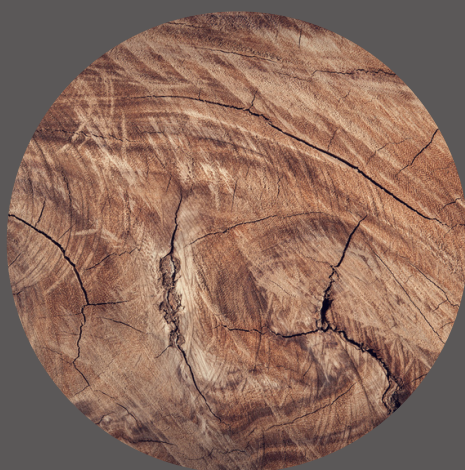

### GALALITH

Made out of cows milk,  
100% compostable.

### HORN

Natural material  
and certificated.

### WOOD

Natural material  
and certificated.

### COROZO

Natural material  
and certificated.

ONLY THE DREAMERS

# PEOPLE

## **PEOPLE IN THE FIRST PLACE**

We believe that it is very important to truly listen to all the people that are involved in our company. From our employers to our clients and suppliers, everybody is important to us.

## **100% MADE IN ITALY**

All our products are 100% made in Italy. Even all the raw materials that we use are sourced in Italy. Undoubtedly, we know who is involved in the production process and there are good working conditions.

## **SUPPLIERS**

We care about our partner companies and have long-term relationships for the best materials. Because all our suppliers are based in Italy, we are sure that the working circumstances are good and according to the European Union rules.

ONLY THE DREAMERS

# PLANET

## **ALWAYS LOOKING FOR BETTER SOLUTIONS**

We produce products with the planet in mind. We try to reduce our impact on the planet and keep searching for new and better solutions. It can be eye-opening to reconsider the choices we make in everyday life. We are changing habits and finding new ways to be more sustainable.

## **ENERGY EFFICIENCY**

We are looking for ways we can maximize our energy efficiency. An example of how we decrease our energy is not using the thermostat until the 8th of November every year. We keep looking for more solutions to increase our energy efficiency.

## **HIGH QUALITY**

All the products are made from raw materials 100% sourced in Italy. Italy is known for its high-quality materials and products. Due to the high quality of our products, they last longer and have less impact on the environment.

ONLY THE DREAMERS

# PLANET

## **PACKAGING**

We use our packaging more than once if that is possible. For example, if we receive a prototype back from the customer or when we receive our raw materials. We try to reuse as many packing materials as we can.

## **SEPARATING WASTE**

We separate our waste and reuse everything we can. Several remains can be used multiple times and do not need to go to waste.

ONLY THE DREAMERS

# PLANS

*We integrated as many sustainable changes and innovations as possible. As written before, all the materials that we use are more sustainable. Apart from this, there are more processes we can improve and make more sustainable. We are never standing still and as creative craftsmen, we always try to keep finding better solutions.*

## TRANSPORT

One of the things we want to improve is the way we transport our goods. Due to our tailor-made products, the client decides when and how the goods will be transported. The transport of the products isn't sustainable enough. We want to make changes in the way we transport the products and try to find more sustainable options.

## DIGITALIZE

We already improved our company with the digitalizing of processes in our company. For example by making an online archive of our products, in this way, our clients can easily see and check products that we have made. Furthermore, we want to digitalize more processes and use as less as paper as possible.

## PACKAGING

We want to improve the kind of packaging that we use. We are looking for solutions that we can use in our company. In the future, we only want to use 100% recycled, reusable or compostable packaging.

## SOLAR PANELS

We are planning to invest in solar panels. In this way, we can generate our own energy. This makes our company independent from energy suppliers and more sustainable.

FUTURE PROOF

THANK YOU  
FOR READING
